Lift and Dispense a Drum with Your Forklift

Forklift-Karriers - 800 Lb. (363 kg) Capacity

Quickly mount on your forklift

MADE

USA

- No tools or truck modifications
- No electric or hydraulic connections
- Provides controlled drum pouring
- Allows 360⁰ drum tilt control in both directions
- Eliminates backbreaking labor and dangerous, makeshift methods
- Model 285AM has spark resistant parts

Morse Forklift-Karriers have a 20' (6 m) long pull chain loop with 10' (3 m) drop so you control drum tilting, 360⁰ in either direction. Dispense a drum right from your forklift. Can also be ordered with Hand Crank or Hand Wheel option for use only within reach.

We recommend the MORStop Tilt-Brake option to automatically hold the drum tilt angle until you move it. This prevents a partially full, unbalanced drum from turning out of control, even when the contents shift from one end to the other.

MORCINCH[™] Drum Handling System

Rimless Plastic Drum Bracket Assembly Handle rimless poly drum or more securely handle a fiber drum

The **Bracket Assembly** provides a brace at top and bottom of your drum to prevent it from slipping lengthways through the drum holder. The Bracket Assembly is required to handle a rimless plastic drum, and recommended to more securely handle a fiber drum. It adjusts for 31" to 39" (79 to 99 cm) tall drum.

Capacity: 800 Lb. (363 kg) full-drum

500 Lb. (227 kg) half-full drum

Half-full rating is an indication of capacity for tilting an unbalanced, bottom-heavy drum. A partially full drum with unbalanced and shifting load is harder to tilt than a full drum.

Installed Options

We recommend **Option # 3900i-P** <u>MORStop Tilt-Brake</u> factory installed on your Forklift-Karrier is recommended to automatically hold the drum tilt angle.

Diameter Adapters

Diameter Adapters allow your Forklift-Karrier to handle a smaller drum. Simply place the correct size Diameter Adapter into the drum holder. When you complete dispensing from your smaller drum, simply lift the Diameter Adapter out of the drum holder to return to handling a 55-gallon (210 liter) drum.

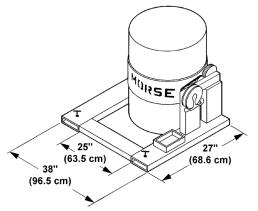

Spark resistant and stainless steel Diameter Adapters are available for the same diameter ranges.

Steps For Use of Forklift-Karriers

- 1. Drive your truck forks into the Forklift-Karrier's fork pockets.
- 2. Dismount and screw down the safety locks to grip the forks.
- 3. Drive to a drum at ground level, so that the drum holder meets the center of your drum.
- 4. Secure your drum in the drum holder between drum ribs... no tools are needed. To secure drum, drape the cinch chain with flexible chain cover across the front of the drum, insert one link into the slot on the ratchet handle, and turn the ratchet handle clockwise to tighten the cinch chain around the drum.
- If your Forklift-Karrier is so equipped, tighten the Top Rim Clamp or adjust the Bracket Assembly height.
- 6. Raise your forklift carriage and the secured drum, then travel to the dumping location.
- 7. To control turning of the drum without leaving your seat, pull the chain loop for complete control of drum tilting.
- To remove drum from your Forklift-Karrier, turn the ratchet handle clockwise to relieve pressure on the ratchet teeth, lift pawl handle to release teeth engagement, then rotate the ratchet handle counter clockwise to loosen the chain and allow its removal from the slot on the ratchet handle.

Custom model 185S-HD-FP handles drum completely below the forks. Requires 17.5" (44.5 cm) between forks. Or use below-hook with your crane.

Use with:

- Walkie Stacker
- Forklift
- Crane or Hoist below-hook
