

Enclosures with Safety Interlock for 310 Series

Help You Comply with OSHA Requirements (Drum Tumblers Sold Separately)

Enclosures for Morse Tilt-To-Load Drum Rotators have a safety interlock to automatically shut off the drum roller when the gate is opened. Open the enclosure gate, secure your upright drum on the base plate, then close the gate to allow operation. Position the RAISE and ROTATE control mast outside the enclosure for easy access.

Outside post-to-post Dimensions: L88" x W52" x H63.25"
(224 x 132 x 161 cm)

Install all Morse Drum Rotators in accordance with OSHA requirements for enclosure and safety interlock, etc. Drum roller automatically turns off when enclosure door is opened.

For OSHA compliance, see OSHA subpart O.1910.212(a)(4) "Barrels, containers, and drums. Revolving drums, barrels, and containers shall be guarded by an enclosure which is interlocked with the drive mechanism, so that the barrel, drum, or container cannot revolve unless the guard enclosure is in place."

Power connections and motor controls must comply with applicable codes.
