

5 Advantages of Hydra-Lift Karriers

>> [Click to Watch Video](#) <<

Hydra-Lift Drum Karriers were originally designed to lift and pour a 55-gallon (208 liter) steel drum. You can easily maneuver an 800 Lb. (363 kg) drum and rotate it 360° in either direction for controlled pouring. Morse quality Hydra-Lift Drum Karriers are durable, carry a 2-year warranty, and made in the USA.

Stainless Steel
Hydra-Lift Karriers

Model 400A-72 shown with
Bracket Assembly Option

- 6' (1.8 m) Pouring height
- Hand pump drum lift
- Chain wheel drum tilt

Model 400A-96-110

- 8' (2.4 m) Pouring height
- Electric power drum lift and tilt

1 Unmatched ability to handle almost any drum

MORCINCH

Drum Handling System

Automatically adjusts to your 22" to 23.5" (56 to 59.7 cm) diameter drum.

Includes a flexible cover on the cinch chain to help protect the sidewall of your drum. Incorporates alloy cinch chain and hinge, and durable stress relief weld joints

Options to handle the wide variety of drums in today's market:

[Top Rim Clamp](#) for a rimmed 55-gallon plastic or fiber drum

[Bracket Assembly](#) for your rimless plastic drum or fiber drum

[Diameter Adaptors](#) for smaller drums

Web Strap with Ratchet

MORcinch™ Drum Holder with Option # 5115i-P Web Strap and Ratchet installed (not for use on spark resistant models)

Diameter Adaptor

2 Ergonomic power-lift and power-tilt control options

You control the lift height and drum tilt angle with two handles. Available with air, battery or AC powered hydraulics. Manual lift and tilt models are also available with a hand pump for drum lift, and a hand crank or pull chain for drum tilt control.

3 Added accessories

- Drum Cones with valves to stop and start material flow
- Drum faucets to fit 2" or 3/4" (5 or 1.9 cm) bungs

4 Better-than-ever safety features

- Gear covers are standard on all Hydra-Lift Drum Karriers.
- Use the floor lock to hold position while pouring a drum.
- A safety check in the cylinder prevents free-fall if the hydraulics are compromised.
- Models with spark resistant parts are available.
- Order [MORStop Tilt-Brake](#) on manual tilt models to automatically prevent unwanted drum rotation caused by shifting weight when tilting an unbalanced or bottom-heavy drum.

5 Unrivaed custom capabilities

Our engineers have designed many custom versions for specialized applications. A few examples of custom models:

- Special finishes like USDA approved epoxy
- Models for non-standard size or type drum
- Greater lift height, higher capacity
- Even altogether new designs! ...give us a call
