MORSPEED™

Forklift Drum Movers

Move More Drums with MORSPEED™

- Lift, move and place rimmed drums right from your forklift
- Mount on forks in seconds. No tools. No power connections
- Raise forks to grip drums
- Massive steel jaws grip upper rim of drum
- 1500 Lb. Capacity per drum

MORSPEED™ Forklift Attachments allow you to grab, lift, move and place drums quickly without leaving the driver's seat of your fork truck. No modification to truck. Massive, contoured steel jaws securely grasp top rim of drum. Jaws are completely mechanical and automatic. Raise forks to grip. Set drums down to release jaws.

Handle straight walled or deformed drum, as it does not depend on drum ribs. Forklift operator simply raises and lowers forks and drives forward and back as necessary.

Handle virtually any rimmed drum:

- Steel closed head or removable top secured with clamp ring
- Rimmed plastic drum with non-removable top
- Fiber drum with metal clamp ring closure secured
- Requires 24" (61 cm) minimum drum height, but will work with any diameter drum
- Minimum weight per drum required to actuate jaws:
 - 75 Lb. (34 kg) on a model with one head per drum
 - 350 Lb. (156 kg) with two heads per drum
- Contact Morse for advice on suitability of unusual drums

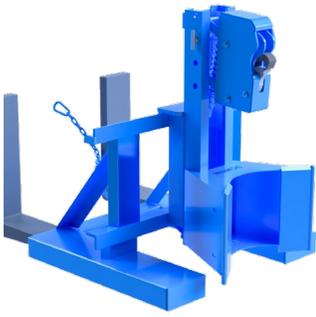

All MORSPEED™ models have wide jaws contoured to securely grasp virtually any rimmed drum. The encased mechanism provides precise, reliable, automatic drum gripping.

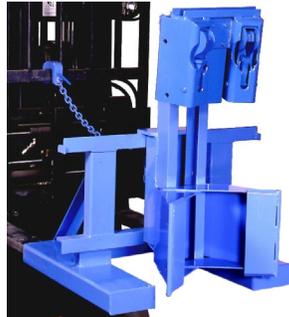

Single head models have one head with jaws to grip top rim of drum... Feature of models 288-1, 288-2 and 287.

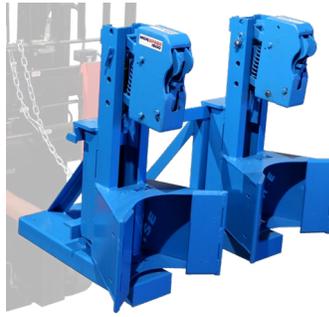

Double head MORSPEED™ models have two heads per drum. They reduce stress on the rim by distributing weight between two sets of jaws... Feature of models 288-1-2H, 288-2-2H and 287-2H.

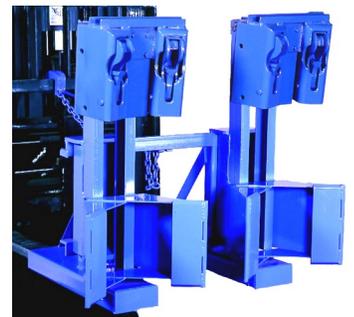

Model 288-1
Designed to handle one rimmed drum

Model 288-1-2H
Two heads to handle one rimmed drum

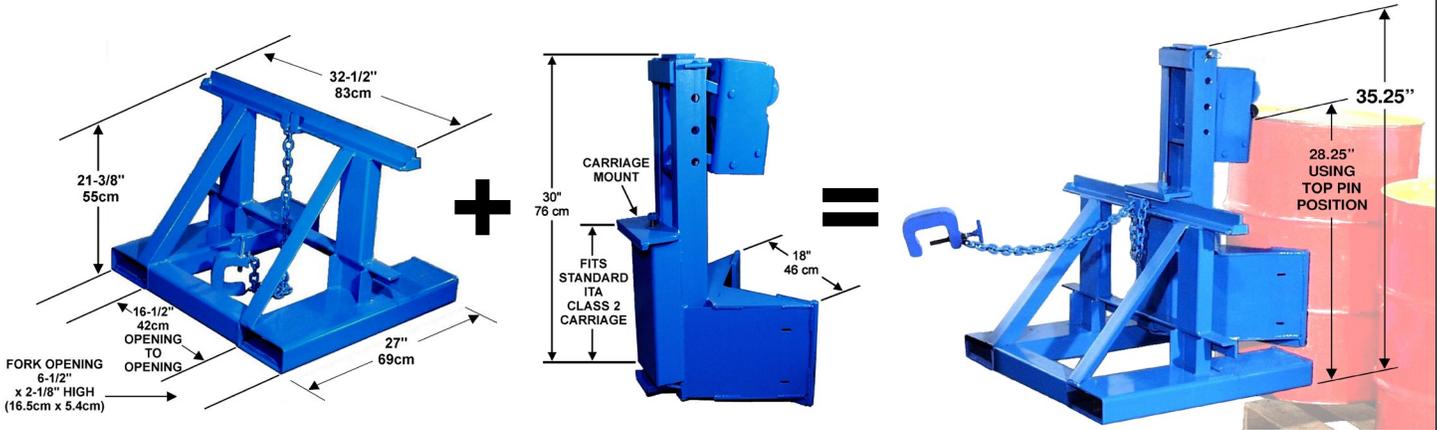

Model 288-2
Two heads to handle one or two rimmed drums at a time

Model 288-2-2H
Two heads per drum to handle one rimmed drum

Model #	Description
288-1	Fork mount, Handles 1 drum with 1 head
288-1-2H	Fork mount, Handles 1 drum with 2 heads
288-2	Fork mount, Handles 2 drums with 1 head per drum
288-2-2H	Fork mount, Handles 2 drums with 2 heads per drum
287	Carriage mount, handles 1 drum with 1 head
287-2H	Carriage mount, handles 1 drum with 2 heads
2523-P	Belted Backrest Kit for Single Drum Handler
2523-2-P	Belted Backrest Kit for Double Drum Handler

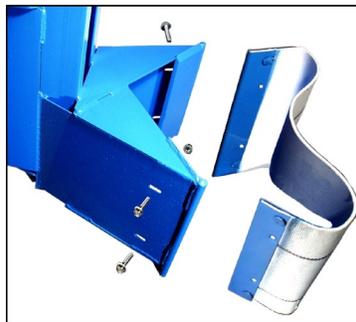

Dimensions

Model 288-0 Fork Reach Mount is a component of **MORSPEED™** drum handlers, but is NOT a drum handler by itself.

Model 287 Carriage Mount can be mounted directly onto an ITA class 2 carriage without forks. For use in tight spaces.

Combine 1 of model 288-0 with 1 of model 287 to make model 288-1 **MORSPEED™** fork mounted drum handler.

Belted Backrest Kit 2523-P puts shock absorbent surface between drum and steel backrest of the **MORSPEED™**. Helps protect finish on drum. Easy to install using 4 bolts provided. Install one beckrest kit per drum position.
