

MORSE 

# MODEL 91

SPECIFICATIONS SHEET

## BELOW-HOOK DRUM LIFTER

*Lift and Move a Drum With Your Hoist*

### Lifter for Steel Drum or Overpack

Morse invented this lifter for placing an upright RIMMED steel 55-gallon (210 liter) drum into an overpack or salvage drum with your hoist. Narrow profile to lower drum completely into overpack. Also lift steel 85-gallon (322 liter) overpack drum.

Effective, simple to use, with carefully designed ice-tong-like geometry and broad-faced, thin profile grippers to minimize pressure on drum.

Lift and move closed steel salvage drum

- 55-gallon (210 liter) steel drum
- 85-gallon (322 liter) steel overpack

Capacity: 1000 Lb. (454 kg)

Every unit is individually load tested at the factory at 125% of rated capacity, and ships with load test certificate.

Complies with ANSI/ASME B30.20 standard. ASME BTH-1 DESIGN CATEGORY B and ASME BTH-1 SERVICE CLASS 1.
